UHF TUNNEL

Positek RFID's UHF tunnel is designed to mount to standard conveyors with minimal modifications. The modular design accommodates conveyors widths between 18" and 45" wide.

The antenna configurations maximize reading inside and minimize reading outside of the tunnel. Software is available to simplify integration to third party software and the product is fully integrated into Positek RFID's software suite.

The industrial design assures a reliable product to ensure the consistent and accurate reading needed without relying on employees.

- Length: Approx 4'
- Height: Varies based on conveyor width
- Fits belts size 20" to 42"
